## DETAILED ACTION

### *Claim Objections*

1. Claims 5-10 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims 5-10 not been further treated on the merits.
2. Claim 1 is objected to because "of one of both of these" (line 15) does not make grammatical sense.
3. Claim 11 is objected to because it recites a "process of laying," but does not include any properly recited steps involved with this process. Correction is required.

### *Claim Rejections - 35 USC § 102*

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Pozin et al. (EP 0 997 582 A1). Pozin et al. discloses a set of elongated elements (1) connected by male and female linking means (Figure 2, for example).

Regarding claims 2 and 3, the linking means are formed as claimed (Figure 2, for example).

Regarding claim 4, there are a plurality of linking means.

Art Unit: 3671

6. Claims 1-3 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Girotti (U.S. Patent 5,046,884). Girotti discloses a set of elongated elements (4) connected by male (Figure 2) and female (Figure 3) linking means.

Regarding claims 2 and 3, the linking means are formed as claimed (Figures 3a and 3b, for example).

### ***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Girotti as applied above, and further in view of Schroughan (U.S. Patent 4,844,652). Girotti does not teach a plurality of linking means. Schroughan teaches that using a plurality of male and female connectors in adjacent barriers maintains the barriers in a more stable arrangement. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have used a plurality of linking means with Girotti in order to obtain a more stable barrier, as taught by Schroughan.

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
